Projects

AI-Powered Biosecurity Farm Management Portal for Pig & Poultry Farms
Developed a web-based digital farm management portal to improve biosecurity measures in pig and poultry farms. The application was built using HTML, CSS, JavaScript, Python (Flask), and SQLite, providing features such as disease risk prediction, health monitoring, farm data management, and preventive alerts to support efficient livestock management.

Student Dashboard using React.js and REST API
Developed a responsive student dashboard using React.js by integrating REST APIs with Axios to display and manage student information. The application includes features such as search, sorting, responsive design, loading indicators, and error handling, providing an interactive and user-friendly interface.
